### President column

Well, I am pleased to see that we are getting a chance to go see what's happening in Princeville. I hope you will join us for the next meeting at the Princeville Heritage Museum. I expect it to be a nice visit to see what's in the shed. We will cut back a bit on the food, and we will ask for those that can, please bring a dessert to share. We will have coffee and desserts and tour the facility!!

Also, our sponsorship drive is taking off. Please show patronage to our sponsors, as they are part of the community we live in. Keep it Rural, it makes one feel good. Also, be on the lookout for upcoming events. We have lots to do this Summer around the community. Hope to see some new faces to help us out.

Lastly, we had a pleasant presentation regarding Frank Hubbell and his Vanishing Architecture (Outhouses). I guess, I am fortunate that we had running water inside the house my whole life, even in South Dakota. By the way, if you have a spot for us to hold a future meeting or a topic to cover, let us know.

Dan

## Vice President Note

Greetings!

April showers bring May flowers.... I hope there's an opportunity for those flowers to get planted sometime this spring. We have several events coming up in June that you may want to attend. Claud-Elen Days parade in Chillicothe, tractor show in Lacon, and the Kickapoo Terquasquicentennial (175 yr.) celebration to name a few. I plan on discussing these events more at the upcoming club meeting but if you are interested in participating and can't make the meeting, please contact me or another club officer and let us know. An updated calendar of events is available on the club website. Hope to see everyone at the next meeting and have a safe spring planting season.

Dean

Hey, wait for me !

## Breaking news Column....

I have just been informed that the Sawmill that Dave, Marty and Jerry picked up last fall is now in operation. The drive engine runs well, and the first log has been cut up, but most exciting is, the boards are straight... Very straight.. So it looks like we now have an operational sawmill and threshing machine in our operations... Very neat folks.. Job well done to all.
